SynCap acted as exclusive M&A advisors and Financial
Advisors to the Buyer

SynCap, Clairfield's partner in Germany and Belgium, acted as exclusive M&A advisor to Belgian based industry holding ACT Group in its recent acquisition of both Agetim Prod SRL and Mecanoplast. SynCap led the negotiations, raised the necessary debt and restructured the group.

ACT RESEARCH NV (www.act-research.be) is a Belgian company specialized in transformation of vans and utility vehicles for large OEM's (Ford, Mercedes, Volkswagen, etc.) that deliver to utility companies such as Belgacom, Fluxys, Coca Cola distributors, etc. These companies need the adapted vans to carry the maintenance operations of their networks.

Mecanoplast, former supplier to Daewoo, UTB and ARO has been a subcontractor to ACT for powder paint, electrolytic galvanization, for injection of plastic parts, for spot welding, press operations and assembly for the last 9 years and owns a complete production site. Acquiring these assets allows the ACT group to extend its production capacity and better serve both the local and international market.
