2011

Elastic Therapy, Inc. was sold to to DJO Incorporated, a portfolio company of The Blackstone Group (NYSE:BX).

ETI is the largest U.S.-based designer and manufacturer of private label medical compression therapy products used to treat and prevent a wide range of venous disorders. Based in Asheboro, North Carolina, ETI is a designer and manufacturer of approximately 200 medical compression products, including surgical weight stockings, anti-embolism stockings, braces, armsleeves, sheer products, and a variety of medical compression socks. These products reduce the incidence of vascular diseases such as deep vein thrombosis and pulmonary embolism, which have been cited as the number one cause of unexpected death and the most common preventable cause of hospital death.

The acquisition of ETI presents an excellent strategic fit for DJO by providing a complementary product suite and distribution channel base to bolster DJO's growing vascular franchise worldwide.

Clairfield Partners in the United States (McColl Partners) acted as the exclusive financial advisor to Elastic Therapy, Inc.
