January 2010

High Care, a Dutch leader in medical staffing, has raised growth capital from Holland Venture, a private equity firm with a focus on the mid-market in the Netherlands.

High Care is one of the most prominent medical staffing specialists for Dutch hospitals and medical industries. The company is located in Rotterdam and employs 150 professionals. High Care provides specialized nurses, surgery assistants, interim-managers, project managers, and organizational advisors in the health sector. This investment will allow High Care, which counts a majority of Dutch hospitals among its customers, to accelerate its growth and expand operations in the Netherlands.

This is the first investment of Holland Venture's new fund of EUR 70 million for expansion and buyout investments in Benelux.

Boer & Croon acted as exclusive financial advisor to High Care.
