2010

Access Control Safety - Jerems was sold to private investors in a management buy-in transaction.

Access Control Safety - Jerems (ACS) is a French company that has developed and patented a wide variety of unique technological solutions for access to elevated worksites. Its product line includes personal protective equipment, collective motorized and non-motorized equipment, platform lifts, and homelifts for individuals or teams.

ACS - Jerems is expected to generate annual revenues greater than € 10 million by 2012.

Clairfield Partners in France (intuitu) acted as the exclusive financial advisors to the sellers.
